

# Test cases - DINA collections data model

June 12, 2017

These illustrations represent eight test cases, A-H, that are central in the DINA collections data model.

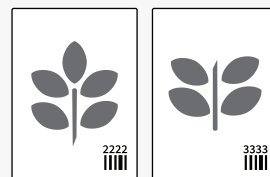

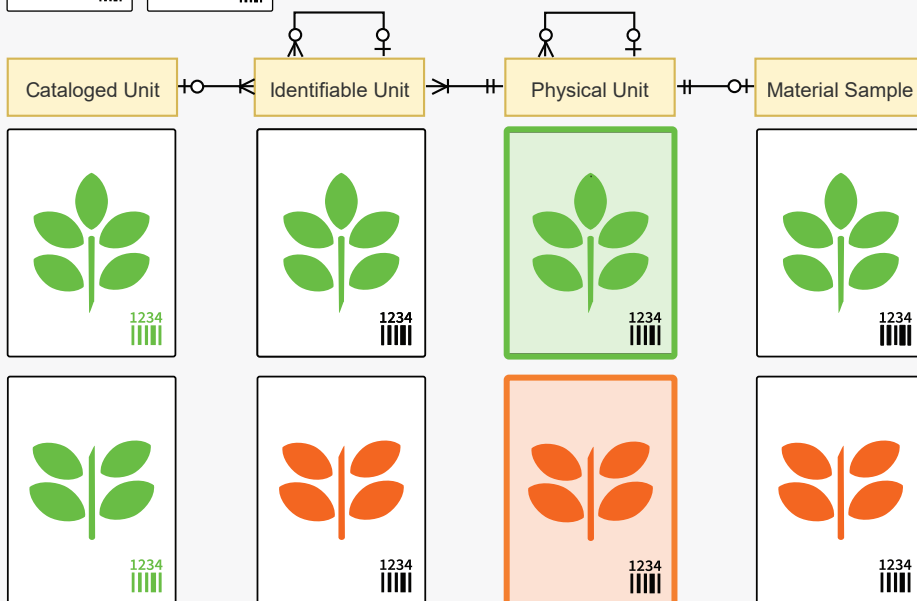

The test cases are based on test cases used for the CCO-model (see [github.com/chicoreus/cco\\_poc](https://github.com/chicoreus/cco_poc)) and can be translated into CCO-model test cases as follows: A=TC0, B=TC0Z, C=TC2, D=TC1, E=TC4, F=TC3 and TC4, G=TC5, H=TC6.

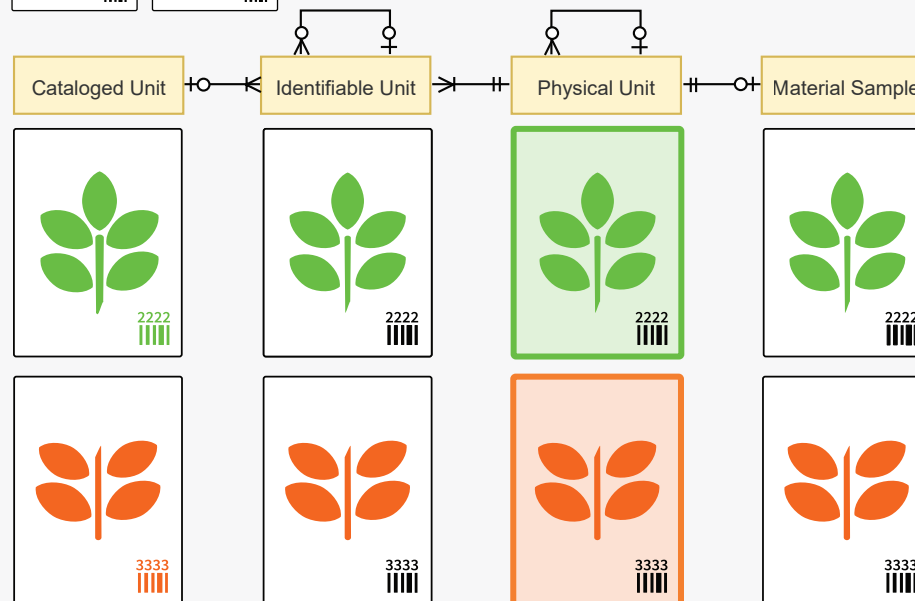

### Case E

One plant mounted on two sheets with the same catalog number on both sheets.

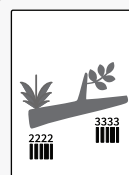

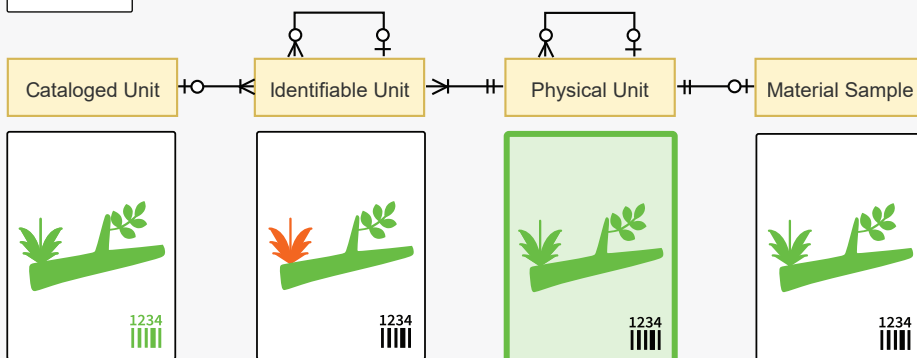

### Case F

One plant mounted on two sheets with a separate catalog number for each sheet.

### Case G

Two plants that are unseparable from each other, sharing one catalog number.

### Case H

Two plants that are unseparable from each other, with one catalog number for each plant.
